**FOR IMMEDIATE RELEASE**

**Allegheny Energy Awards \$30,000 TechConnect Grant to Union Senior High School**  
*Contribution to Purchase Computer Equipment for Classroom Instruction*

**Hagerstown, Md., October 18, 2001** – As part of its proud and enthusiastic commitment to communities, schools, and students, Allegheny Energy, Inc. (NYSE: AYE) announced today the award of a \$30,000 TechConnect Classroom Technology Grant to Union Senior High School. The TechConnect grant, which will be used to purchase computers, printers, servers, and other computer hardware, will assist the school in improving its technology programs in math and science.

“We are excited to announce the award of a TechConnect grant to Union Senior High School,” said J. Michael Eckard, Allegheny Energy’s Director, State Affairs. “This grant will benefit the students and staff of Union Senior High School and will further our mission of enhancing educational technology programs in the communities we serve.”

Union Senior High School was one of 10 schools selected to receive a 2001 TechConnect grant. Public and private schools, grades kindergarten through 12, in the Company’s service territory, which includes parts of Maryland, Ohio, Pennsylvania, Virginia, and West Virginia were eligible to apply for a TechConnect grant. More than 200 schools submitted grant proposals, which were evaluated by teams of educators and business leaders.

“We were pleasantly surprised that our district was a recipient of a grant due solely to the efforts of all our staff,” says Robert J. McWilliams, Superintendent, Union School District. “We are grateful to Allegheny Energy for this opportunity to purchase equipment that facilitates educational projects, because it allows an economically poor school district like ours to move toward the same playing field level as the more affluent districts.”

TechConnect is the cornerstone of Allegheny Energy’s Corporate Giving Program, which contributes annually to a wide variety of community needs, including local United Way agencies, volunteer fire companies, museums, and education. By supporting technology in schools, the Company can help provide communities with highly skilled and diverse employees and increase economic development opportunities.
