Allegheny Energy Awards \$30,000 TechConnect Grant to Yough Senior High School *Contribution to Purchase Computer Equipment for Classroom Instruction*

Hagerstown, Md., October 29, 2001 – As part of its proud and enthusiastic commitment to communities, schools, and students, Allegheny Energy, Inc. (NYSE: AYE) announced today the award of a \$30,000 TechConnect Classroom Technology Grant to Yough Senior High School. The TechConnect grant, which will be used to purchase computers, printers, servers, and other computer hardware, will assist the school in improving its technology programs in math and science.

“We are excited to announce the award of a TechConnect grant to Yough Senior High School,” says Jay S. Pifer, President, Allegheny Power. “This grant will benefit the students and staff of Yough Senior High School and will further our mission of enhancing educational technology programs in the communities we serve.”

Yough Senior High School was one of 10 schools selected to receive a 2001 TechConnect grant. Public and private schools, grades kindergarten through 12, in the Company’s service territory, which includes parts of Maryland, Ohio, Pennsylvania, Virginia, and West Virginia, were eligible to apply for a TechConnect grant. More than 200 schools submitted grant proposals, which were evaluated by teams of educators and business leaders.

“We are very excited and honored to have this opportunity to expand our technology resources,” says Ronald S. Yuvan, Principal, Yough Senior High School. “The TechConnect grant will allow us to better utilize our environmental project on the assessment of the water quality of the Yough River, an ongoing project involving students and teachers. The school also plans to share the resource with the Yough River Environmental Learning Center to extend learning beyond the bounds of the Yough School District.”

TechConnect is the cornerstone of Allegheny Energy’s Corporate Giving Program, which contributes annually to a wide variety of community needs, including local United Way agencies, volunteer fire companies, museums, and education. By supporting technology in schools, the Company can help provide communities with highly skilled and diverse employees and increase economic development opportunities.
