Rivesville Power Station wins West Virginia Governor's Safety Award

Hagerstown, Md., November 26, 2001 – Continuing to build upon a steadfast commitment to safety, the 45 Allegheny Energy Supply employees at the Rivesville, W.Va., Power Station recently received the 2001 West Virginia Governor's Safety Award.

“The West Virginia Safety Council highly regards the Rivesville Power Station employees' proactive commitment to safety and health in the workplace,” says Donna S. Hawkins, Executive Director, West Virginia Safety Council. “We are proud that Allegheny Energy and its Rivesville Power Station employees are part of the tradition of outstanding safety performances in West Virginia.”

The award was presented at the West Virginia Awards Banquet during the Governor's 67th Annual Safety, Health, and Environmental Conference last month.

“We are honored to receive this prestigious award that recognizes our unwavering commitment to safety,” says Ronald D. Windon, Regional Director, Harrison/Rivesville Region. “This is more positive news for our employees who are committed to making safety a top priority in the workplace and ensuring reliable energy services for our customers.”

The Rivesville Power Station employees were also recognized last March by the Western Pennsylvania Safety Council for their outstanding achievements in occupational safety and health.

Allegheny Energy Supply develops, owns, and operates electric generating facilities and supplies and trades energy and energy-related commodities in selected domestic retail and wholesale markets. With its recently announced acquisitions and expansion plans, Allegheny Energy Supply will have ownership or control of generating capacity totaling more than 14,500 MW by 2005, with assets strategically located throughout the United States.
